

The Laurel Highlands School District, through a partnership with the Intermediate Unit #1 and the United Way of Southwestern Pennsylvania, has been able to secure grant funding through the Community Innovation Zone Grant and the United Way Deeper Engagement Grant to collaboratively come together and provide quality early learning experiences through the Mini-Mighty Mustang Program in an effort to assist our families, schools, and community. Through these grants, we have been able to provide literacy resources to parents, professional development for both teachers and parents, educational programming, implement district literacy initiatives, and share these benefits with early childcare partners within the district boundaries.
