

INFORMATIONAL: DISTRICT TECHNOLOGY UPDATE

Laurel Highlands is proud to announce that we are implementing a one-to-one technology initiative for our students. We have purchased 1,000 laptops to be placed in every math, science, English and social studies classrooms at the high school. Next year, high school students will be assigned a laptop to take home and we will purchase middle school classroom laptops. The following school year, middle school students will be assigned a laptop to take home. The following year, we will push technology into the elementary schools. Currently, 50% of the laptops have been distributed into the high school classrooms and we expect the other 50% to be finished within the next two weeks.

Also, we have placed one more classroom set of laptops at the middle school and two more into the elementary technology classes through various grants. We have purchased 48 iPads and coding kits to be utilized in the kindergarten classrooms.

Finally, the high school One Button Video Studio at the high school will receive a light board to enhance recorded lessons and the high school Mini Mighty Mustang mentors will be working on an Augmented Reality project that focuses on children's books with CMU.
