

LAUREL HIGHLANDS SCHOOL DISTRICT

Office of Federal Programs

Dear Parent(s) and Guardian(s),

The Laurel Highlands School District has increased its technology initiatives over the last three years to include a 1:1 Chromebook initiative in grades 3-12, as well as increasing the amount of iPads available to students in grades K-2.

While there is no leading research that states that increasing technology access alone to students will create higher achievement rates, we understand that it is how the technology is utilized that fosters a learning environment that can make it easier to differentiate instruction to fit the needs of all learners.

With this in mind, our textbooks have digital applications that provide additional resources to students and families that allow a greater home and school connection. We also offer multiple digital platform learning programs to our students that can be accessed from home.

The district now utilizes a single sign-on app called Clever that requires the student to enter their Google email address and password. This will allow your child to have access to the ConnectED and Pearson textbooks utilized in class, Moby Max, Epic! Books and more with only one single log-in! Go to the Clever login page: www.clever.com/login and search for your student's school. **Log in using your student's district email and password.** If you're unsure, please reach out to your child's teacher for the correct username and password to use with Clever. Once your student is logged into their Clever Portal, they can click on the application icon they'd like to use.

Sincerely,

Eric M. Gaydos, M.Ed
Director of Federal Programs
Assistant Curriculum Director
